PROJECT: Thieme Drive, Fort Wayne, Indiana Section 14

DESCRIPTION: Severe erosion on the South side of the St. Mary's River along Thieme Drive has caused the riverbank in this area to threaten the integrity of approximately 500 feet of roadway and adjacent utilities. Should this road and the utility structures be undermined, the non-Federal interests believe significant economic and social impacts to the Fort Wayne, IN community would result.

FY07 funds would be used to complete the Feasibility phase and finalize the project plans and specifications, followed by solicitation and award of a construction contract. However, approval to sign a PCA in FY07 will be necessary in order to proceed to construction.
